

## The Consortium II Unified Capabilities Audio Conference System

*Performance Advantages of the Consortium II  
Unified Capabilities Audio Conference System - All IP Based System  
APL Listing TN 1320401  
Providing Mission Critical Communications When You Need Them*

- **All IP Based Unified Capabilities Audio Conference System.** The DOD has called for the enterprise wide implementation of Unified Capabilities to be fielded to DOD components by fiscal 2016. UC includes a broad set of IP-enabled voice, video and data sharing capabilities that enable unprecedented joint collaboration among the military services and defense agencies.
- **Voice Network Connectivity** via AS-SIP with TLS and SRTP encryption via the ASLAN directly to LSC's, SC, or SS listed on the APL.
- **WebView**, the new **Web Services based browser interface** for system administration and user access via a site enabled PKI workstation or PC; requires no plug-ins.
- **Advanced Scheduling Capabilities** via WebView browser or Microsoft Outlook (plug-in) for conference scheduling and notification.
- **Multiple PreSet Conference Options** connect all participants quickly and efficiently (initiated at conference scheduled start, by first caller or host arrival, by chairperson on demand, and via browser window or touchtone codes).
- **Large reference base** of successful DOD server installations completed.
- **Information Assurance Compliance** - SCAP Compliance Scan Score over 96%; Forum turnkey installation includes scan and mitigation assistance.
- **Scalable to 2000 Sessions** (1920 PRI Ports) in a 4U Chassis.
- **Multi-level Precedence and Preemption (MLPP)** for both Meet Me and Preset Blast dial conferences.
