1. DoDIN APL approval of the Forum Communications Consortium III Rel. 11.1.0 TN 1710301 as a UCCS has been granted. The Risk Management Executive (RME) recommended DoDIN APL placement on 27 October 2017 based on the Cybersecurity (CS) testing completed by the Joint Interoperability Test Command (JITC) Ft. Please note that Services and Agencies are required to recertify and reaccredit their systems every three years. Please refer to the DoDIN APL for official posting of this solution at the following site: <https://aplits.disa.mil/apl>.
2. This product/solution must be implemented only in the configuration that was tested and approved. To ensure an acceptable level of risk for each site's Authorizing Official (AO) / Designated Accrediting Authority (DAA), please utilize this solution's deployment guide and refer to the Conditions of Fielding (CoF) as depicted within the Cybersecurity Assessment Report (CAR). The CAR is included in the Cybersecurity Assessment Package (CAP) and can be requested from the Approved Products Certification Office (APCO) per paragraph 4 of this document.
