For Immediate Release

Forum Communications Showcases Consortium II and Alert II Products at the Air Force Information Technology Conference 2010 in Montgomery, Alabama.

Forum Communications Showcases Consortium II JITC Certified Conference Systems and Alert II Primary Crash Networks at the Air Force Information Technology Conference 2010 in Montgomery, Alabama.

Richardson, Texas - September 7, 2010 - Forum Communications International announced today its successful participation in the Air Force Information Technology Conference (AFITC) 2010 in Montgomery, Alabama, and enjoyed overwhelming responses from existing and potential military customers.

This year's AFITC conference was the 23rd Annual Conference and showcased how current and future IT products and services are used to aid the national defense and intelligence communities. This year's conference theme: "Dominance at the Speed of Need" emphasized how streamlining the acquisition process is vital to keeping pace with innovations in IT, and putting those dominant capabilities more quickly into the hands of our Airmen, Soldiers, Sailors, and Marines.

By bringing together more than 6,000 active duty, guard, reserve, civilian and industry partners, AFITC is one of the primary tools for keeping Air Force IT leaders current on how to best apply the latest cutting edge technology to keep the USAF most advanced fighting force in history.

Forum's JITC certified Consortium II conference server and the Alert II Primary and Secondary Crash Alarm Systems were showcased. The Consortium II provides key communications capabilities for government and military conferencing and collaboration applications and the Alert II provides Airfield emergency communications for aircraft rescue and fire fighting and emergency first response teams.

This leading industry conference addresses the key military market segments served by Forum; the Army, Air Force, and Air National Guard forces and bases across the US and the globe. The conference also provides the opportunity for Forum to meet with its strategic distribution partners such as Black Box, General Dynamics, and Lockheed Martin, who provide Forum solutions to mutual DOD customers. "These key segments represent a significant part of Forum's installed customer base, and a great opportunity for us to meet first hand with existing and new customers within the DOD

who require secure communications platforms with proven reliability, usability, and performance" said Noel H. Schnell, Vice President, Forum Communications.
