For Immediate Release

Forum Communications Successfully Deploys JITC Certified Consortium II Conferencing Systems

Forum Communications Successfully Deploys JITC Certified Consortium II Conferencing Systems at Army and Air Force Bases, and In-Theater to Support DOD Operations in Afghanistan.

Richardson, Texas - April 7, 2010 - Forum Communications International today announced the successful installation and cutover of several of its Joint Interoperability Test Command (JITC) Certified conference systems. The initial systems were successfully deployed during the 4th quarter of 2009 and the 1st quarter of 2010. Twin conferencing systems were deployed at the first site, a large Army base in the south, to replace aging and outdated technology. Additional deployments took place at a prominent Air Force base in Maryland, Air Force Command sites in Colorado and California, an additional Army facility in the West and several systems deployed In-Theater to support the operations in Afghanistan.

The Consortium II received certification in September 2008 from the Defense Information Systems Agency (DISA) and provides flexible yet sophisticated conferencing and collaboration capabilities for government and military on all DSN Voice Switches using an ISDN PRI interface. The DISA Unified Capabilities Approved Products Listing can be viewed at <http://jitc.fhu.disa.mil/apl/dsn.html>.

"The deployment of these JITC Certified systems heralds a great success story for Forum and underscores the potential for our new and existing customers within the Defense Switched Network. The Consortium II is the perfect solution for customers who require secure communications platforms coupled with simple, easy to use conferencing and collaboration capabilities. Forum products offer proven reliability, usability, and performance," said Noel H. Schnell, Forum vice president, Sales & Marketing.

About Forum Communications

Celebrating 20 years of service excellence and customer satisfaction, Forum Communications has over two decades of experience in the design and deployment of audio conference and collaboration products and emergency response solutions. Forum's complete line of conference and collaboration products and emergency response solutions have been the products of choice for Military (DoD) applications, industry and enterprise customers of all sizes, from small business and branch offices to Fortune 500 organizations, and military bases around the world.
