

Whatever your Conferencing Needs, Forum has you Covered!

The Guard depends on Forum Communications for their Emergency Response Systems.

Forum's Consortium II Conference Server and Alert II Emergency Conference System provide superior teleconferencing and emergency response communications to Business, Industry, Government and Military customers worldwide.

The **Consortium II** has been JITC Certified for Information Assurance and Inter-Operability requirements for the Defense Switched Network. It is a powerful conference server which brings together ease of use, a comprehensive feature set and powerful system management capabilities.

Extensive conference management features put conference control into the user's hands to ensure more productive meetings.

The **Alert II** Emergency Conference System is an emergency crash conference system designed specifically for Military Airfield and Commercial Airport applications. The system is completely independent, extremely reliable, and provides "One Touch" activation and configuration.
