Confer NET

In a study by In-Stat, analyst David Lemelin predicts that by 2011 at least two-thirds of US businesses will be VoIP subscribers¹. This is a prime example of how Forum Communications is on the cutting edge of technology. Forum’s Confer NET is a SIP Conference server that enables voice conferencing. Multiple conferences can co-exist on the Confer NET with accessibility through an auto attendant. One Conference server can be shared across multiple global workgroups. Deploying a Confer NET can save businesses significant costs over traditional network based conferencing services.

Lowering Costs

Confer NET eliminates the need for an expensive conferencing service. Monthly recurring costs are eliminated with low cost system that practically manages itself. Affordable, adaptable, easy to use, Confer NET offers a collection of characteristics that accelerates the adoption of SIP as global standard.

SIP Based Conference Server

The Confer NET is a full featured, low-cost Voice over IP conference server designed for businesses that either have or are planning to deploy VOIP communications.

Connected over 10Base-T structured wiring, the Confer NET allows voice conferencing of up to 25 participants in one or more simultaneous call clusters.

The Confer NET’s robust features include conference scheduling, e-mail notifications, meet-me conferences, automatic dial-out to participants, locking/recording a conference, as well as web based conference creation wizard and user friendly administration.

Who Benefits from it?

Organizations of all types and sizes enjoy the benefit of incorporating audio conferencing into corporate communications processes.

Confer SE

Small to Medium Size Business (SME) have to monitor cost. One way to reduce cost is Forum’s Confer SE. It provides a streamlined package for reliable, affordable, Confer “meet-me” conferencing technology. Installation is plug and play using analog ports (amphenol connector or T1 interface is optional).

- Network Crossover Cable is supplied for initial setup.
- Utilize straight through cable for network connection and operation.
- Administrator, Moderator and User Monitor Screens

Having a Confer SE on-site at your premises puts you in control of your conferences restrict access to conferences with programmable conference room entry codes

- change them before each new conference starts
- up to 15 digits long
- keep unwanted callers out of your conferences
- assign PINs to identify attendees in conference

What is audio conferencing?

Telephony communications that allow a number of people to be linked together through a telephone call wherever they are geographically scattered.

Why audio conferencing?

Timely information delivered in real time, bringing people and ideas together rapidly without any boundaries.

How is it done?

As easy as picking up a telephone and dialing a number and providing a conference room number.

Delivers the easiest and most cost effective way to communicate and collaborate among employees, customers, suppliers and partners, faculty and students, doctors and patients.

If you did not get a chance to visit our booth during 2007 ITEC and missed out on the fabulous opportunity to learn more about our products join us for a free Webinar on July 22, 2007 at 10:00 am CNT. Our guest speaker will be Neal Jabara and Todd Zimmermann. They have over thirty years of combined experience in the telecommunication's sector.

Study: Companies like variety in their VOIP systems
