For Immediate Release

Forum Communications, Inc. and Security Solutions Install First Responder Solution at John Wayne International Airport

Richardson, Texas August 26, 2005 – Forum Communications, Inc. and Security Solutions Install First Responder Solution at John Wayne International Airport

Forum Communications International, a recognized leader in the innovation, development and manufacturing of state-of-the-art audio conferencing bridges and Security Solutions (Los Alamitos, CA) announced today the installation of a new product -- Alert Plus a preeminent airport security system specifically designed to provide instant collaboration and response collaboration. The Alert Plus establishes a new benchmark to support public safety and infrastructure safety programs, especially during national emergencies or local threats.

The strategic alliance between Forum Communications and Security Solutions has spawned a union dedicated to promoting homeland security solutions that satisfy federal requirements for the protection and safety of travelers using commercial air travel.

"Our work with Security Solutions and the release of our new Alert Plus system represents a major milestone for commercial airports seeking to either upgrade outdated first response technology and/or needing to comply with new homeland security standards," said Richard Penn, Forum's vice president of marketing, sales and business development. Citing the two companies' recent installation at John Wayne Airport in Orange County, California, Penn added, "Commercial airports today still rely on outmoded methods of first alert procedures. By working with Security Solutions, we're advancing the first responder standard and helping airports reassure passengers that all measures are being employed to ensure their well being."

"By bringing together the two companies, a clear vision has emerged between the two organizations for smoothly integrating their respective know-how. We are both committed to ensuring that we maximize the potential of what we are certain will evolve into a recognized first response security solution for commercial airports" said Security Solutions chief executive officer, Tim DeWeese.

The alliance is a partnership that understands the rapidly evolving homeland security industry. Forum and Security Solutions team effort creates a powerful synergy to integrate Forum's Alert Plus products and Security Solutions prevailing security operations expertise with exceptional

efficiencies and speed. The alliance embraces its responsibility to the commercial airport industry and their urgent mandate to migrate from today's out-of-date, PBX-oriented first alert systems to a system like Alert Plus which has been designed specifically for first response applications.

Forum Communications International is known worldwide for reliable affordable teleconferencing technology, offering a full suite of teleconference and emergency collaboration solutions for business and emergency communications. Forum is actively involved in the National Community Reinvestment Coalition to create high-potential business partnerships.

Security Solutions has a proven track record of developing high-technology systems for high requirement clients throughout the country. Security Solutions employs the finest technicians, installers and service personnel. Security Solutions has grown to be the largest independent, systems integration company in Southern California.
